NPDES Permits, which are issued to all municipal and industrial facilities discharging wastewater into the "waters of the state," expire after five years. Waters of the state means such accumulations of water, surface and underground, natural and artificial (manmade reservoirs or channels), public and private, or parts thereof, which are wholly or partially within, which flow through, or which border upon the state of Indiana. This chart tracks three types of general and individual NPDES permit applications: 1) permits which are still effective and for which a renewal application already has been received; 2) permits for which the renewal application was received after the permit expired; and 3) permits which have been administratively extended because the renewal application was received prior to the permit becoming expired.
